INTRODUCTION

This report's goal is to give a thorough explanation of Sri Lanka's tourism management system. It will describe the background and characteristics of the system, its interfaces, design, development, test results.

BACKGROUND OF THE PROJECT

The cloud4 Travel and Tourism website project was initiated in order to provide a comprehensive and user-friendly platform for individuals planning their next vacation or business trip. The target audience for the website includes leisure travelers, business travelers, and travel agents.

The website will feature destination guides with detailed information on popular tourist destinations, including things to do, where to stay, and where to eat. Users will also be able to read reviews of hotels, restaurants, and other travel-related businesses, as well as book transport and hotels directly through the website.

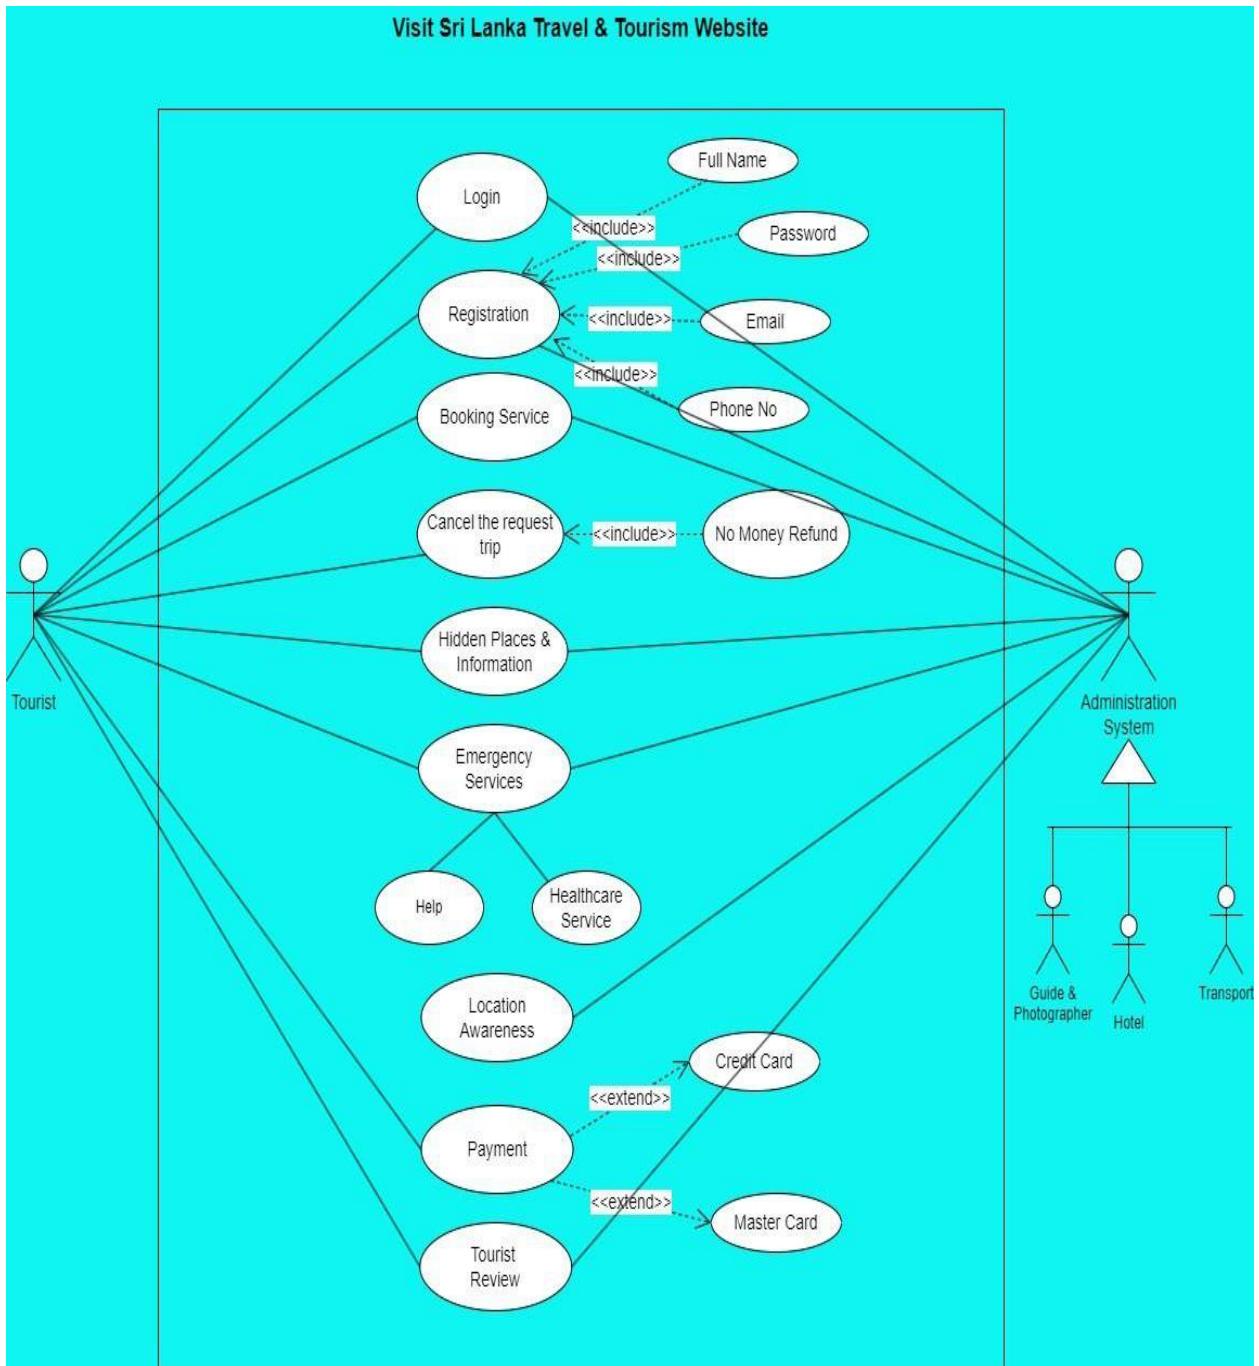

In addition, the website will offer a trip planning tool that will allow users to create personalized itineraries and share them with friends and family. The website will also include a travel blog, featuring articles written by travel experts and destination-specific information.

To promote the website, a comprehensive digital marketing strategy will be implemented, including search engine optimization, social media marketing, and email marketing campaigns. The website will also be optimized for mobile devices, allowing users to access the site and plan their trips on the go.

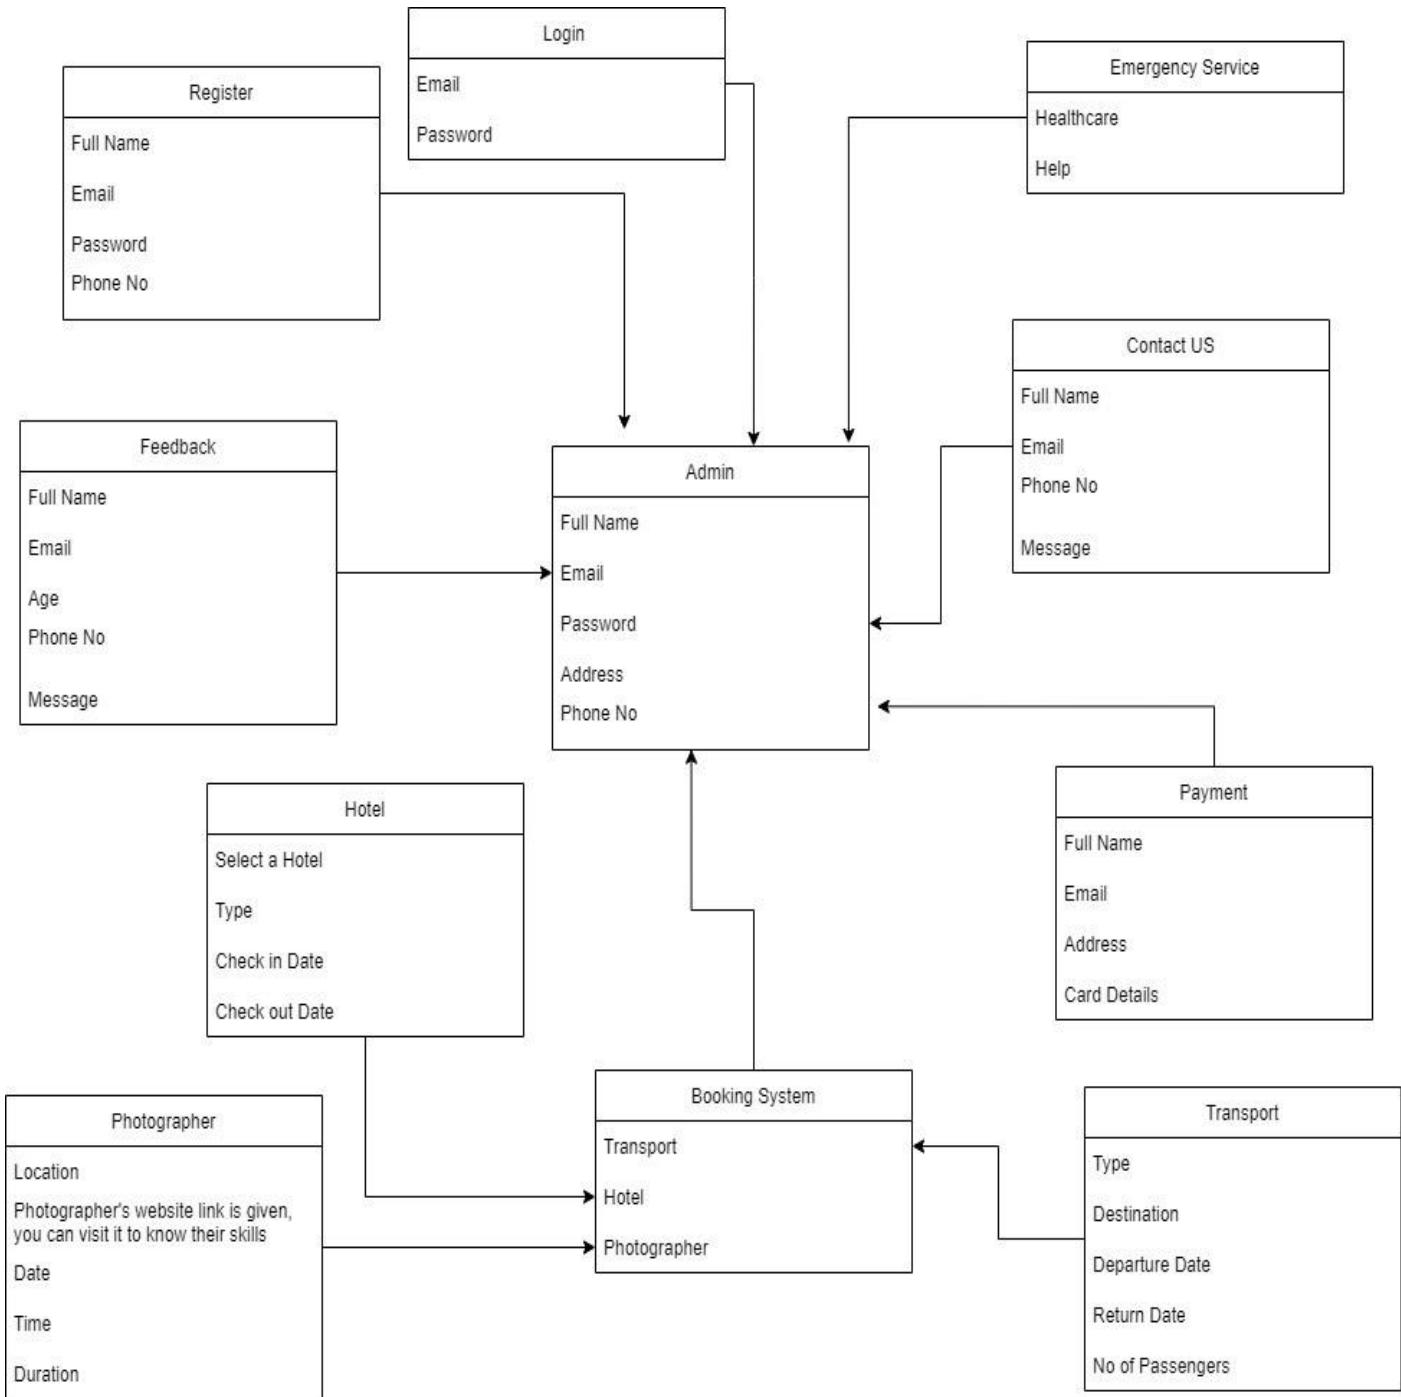

The goal of the cloud4 Travel and Tourism website project is to become the go-to resource for individuals planning their next travel adventure and make the process of planning a trip as seamless and enjoyable as possible.

TEST CASE DOCUMENTS

It is merely a list of chores that you keep track of for simpler tracking. A software test checklist outlines the tests you should conduct according to a certain process. You can determine all the tests you need to run, the number of successful and failed tests, and more by using a software test checklist.

Test Case Document Google Drive Link:

https://docs.google.com/spreadsheets/d/1Gactd5x70aoChqcB4_4tFoC60KcBRn1m/edit?usp=share_link&ou_id=102986765256943188125&rtpof=true&sd=true

DEVELOPMENT

- The technology we used :- Html , Css , JavaScript , Sql , Php
- We have contacted task contributing for the project in the Github repository . Our mentor is a member of Github repository
- Github Link : <https://github.com/cloud4-cloud4>

OUTPUT OF THE SYSTEM

The screenshot shows a web browser window with the title bar "complete responsive tour and tra x". The address bar shows the file path "C:/Users/DELL/Desktop/Cloud%204%20Website/index.html". The page content includes a dark header with the logo "CLOUD 4 TRAVEL" and navigation links: HOME, BOOK, PLACE, EMERGENCY, PAYMENT, FEEDBACK, and a yellow "SIGNUP" button. Below the header is a section titled "OUR TEAM" in orange, enclosed in a rounded rectangle. It features two team members: Narkis Jahan, a woman wearing a yellow hijab, and Afni, a man with glasses and a black shirt. Each profile includes a small circular photo, the name, and a brief description: "Bachelor Of Software Engineering, Student At Open University Of Sri Lanka, Polonnaruwa District, North Central Province" for Narkis and "Bachelor Of Software Engineering, Student At Open University Of Sri Lanka, Ampara District, Eastern Province" for Afni. The Windows taskbar at the bottom shows various pinned icons and the system tray with the message "Activate Windows Go to Settings to activate Windows." The date and time are 1/29/2023, 10:02 PM.

Central Province

History

The Central Province in the center of the country is a mountainous region; it produces much of the famous Ceylon tea. Sri Lanka's highest peak Mount Pidurutalagala, (Mount Pedro; 2,524 m), is located here, close to the city of Nuwara Eliya. The Central Province is also a major tourist destination because of its picturesque landscapes and temperate climate and its hill station towns of Kandy, Nuwara Eliya, and Gampola. The largest city and capital of the province is Kandy, known as one of the most scenic cities in Sri Lanka.

The Sacred City of Kandy official website is a UNESCO World Heritage site since 1988, described as: "This sacred Buddhist site was the last capital of the Sinhala kings whose patronage enabled the Dinhahala culture to flourish for more than 2,500 years until the occupation of Sri Lanka by the British in 1815.

It is also the site of the Temple of the Tooth Relic (the sacred tooth of the Buddha), which is a famous pilgrimage site. Also in Central province lies the Ancient City of Sigiriya official website another UNESCO World Heritage site. The ruins of the capital built by the King Kassapa I (477–95) lie on steep slopes and at the summit of a granite peak (the 'Lion's Rock') standing some 370 m high. A series of galleries and staircases emerging from a

Northern Province

History

The Eastern Province stretches along the eastern coast of the island at the Bay of Bengal (Indian Ocean). Characteristic features of the coastline are lagoons and inlets; the largest city is Kalmunai, a Muslim-majority municipality in the country. The province capital is Trincomalee, a major port city with a population of about 100,000 inhabitants. Trincomalee is one of the major centers of Tamil culture and language. One of the city's main attraction is the Temple of the Thousand Pillars, the Koneswaram, the most famous Hindu temple in the country, devoted to Shiva in the form of Kona-Eiswara (Konesar). The temple is built atop Swami Rock, a rocky promontory cape overlooking Trincomalee and the Indian Ocean.

North Central Province

History

North Central Province is sparsely populated, its capital is Anuradhapura, the Sacred City of Anuradhapura official website is a UNESCO World Heritage Site: Anuradhapura "a Ceylonese political and religious capital that flourished for 1,300 years, was abandoned after an invasion in 993. Hidden away in dense jungle for many years, the splendid site, with its palaces, monasteries, and monuments, is now accessible once again."

Attractions

North Western Province

History

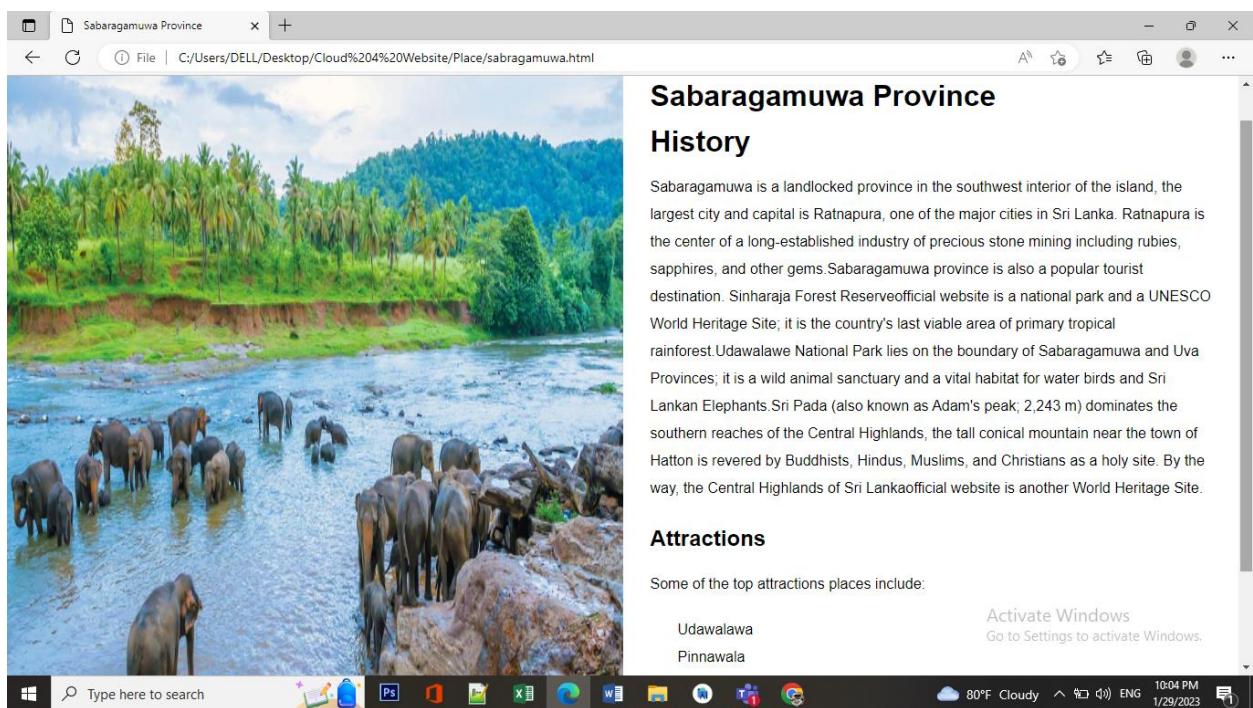

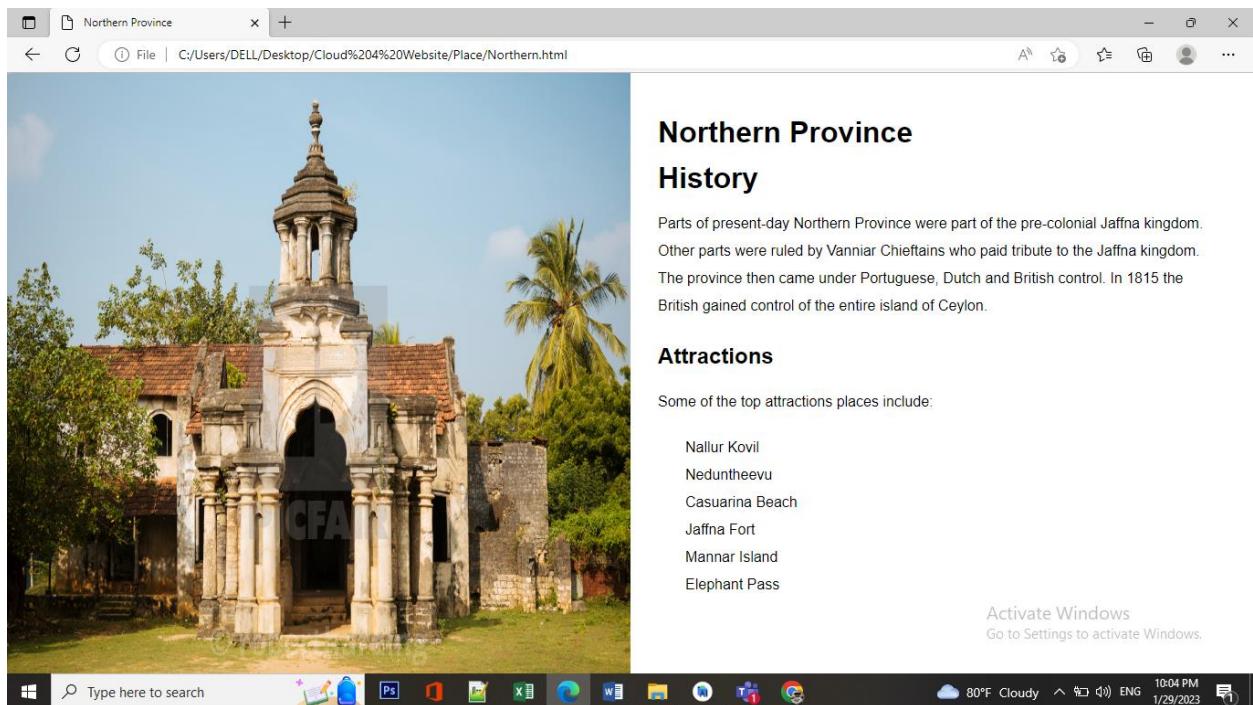

The North Western Province (Wayamba) offers a rural landscape with coconut plantations and domestic wildlife in three parks/sanctuaries (part of Wilpattu National Park, Kahala-Pallekele Sanctuary and Mundel Bird Sanctuary). There are stretches of sandy beaches with peaceful lagoons and the remains of four medieval capitals of Sri Lanka: Panduwasnuwara, Dambadeniya, Yapahuwa, and Kurunegala. The largest city and capital is Kurunegala, a major commercial and transportation hub in the region.

Attractions

Some of the top attractions places include:

- Kudawa Beach
- Athugala Rock
- Kalpitiya Fort
- Baththalanguduwa

Activate Windows

Northern Province

History

Parts of present-day Northern Province were part of the pre-colonial Jaffna kingdom. Other parts were ruled by Vanniar Chieftains who paid tribute to the Jaffna kingdom. The province then came under Portuguese, Dutch and British control. In 1815 the British gained control of the entire island of Ceylon.

Attractions

Some of the top attractions places include:

- Nallur Kovil
- Neduntheevu
- Casuarina Beach
- Jaffna Fort
- Mannar Island
- Elephant Pass

Sabaragamuwa Province

History

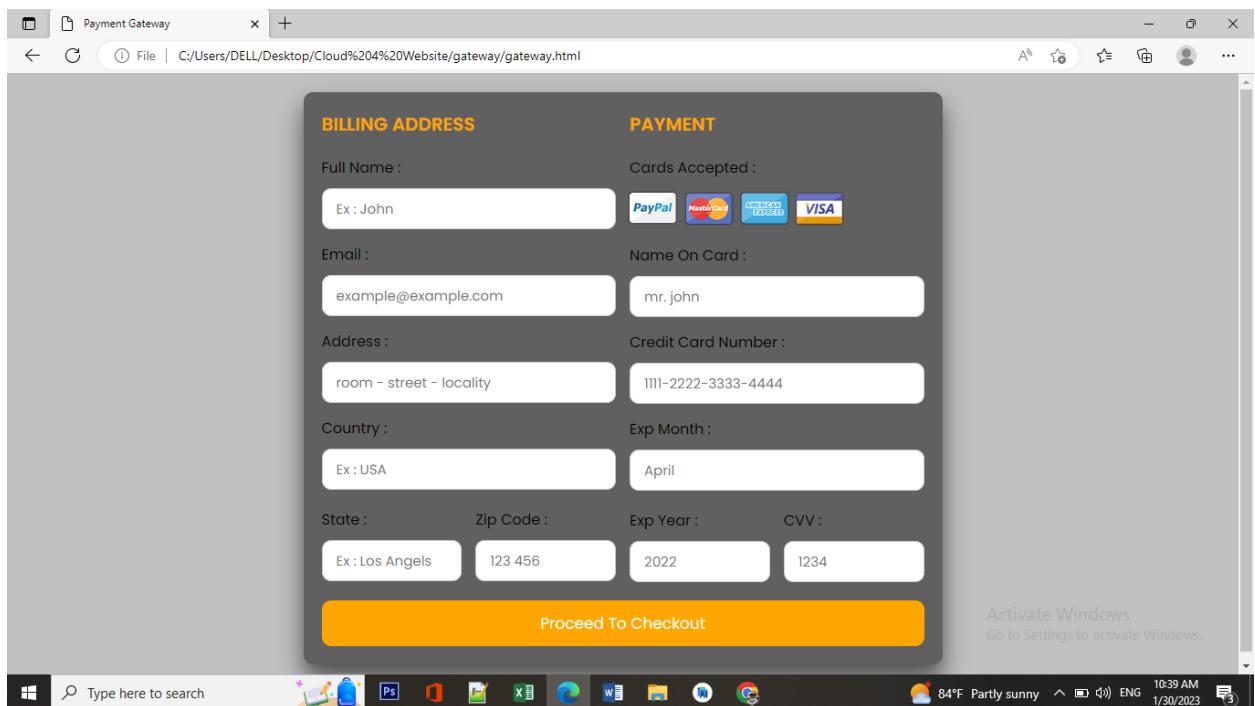

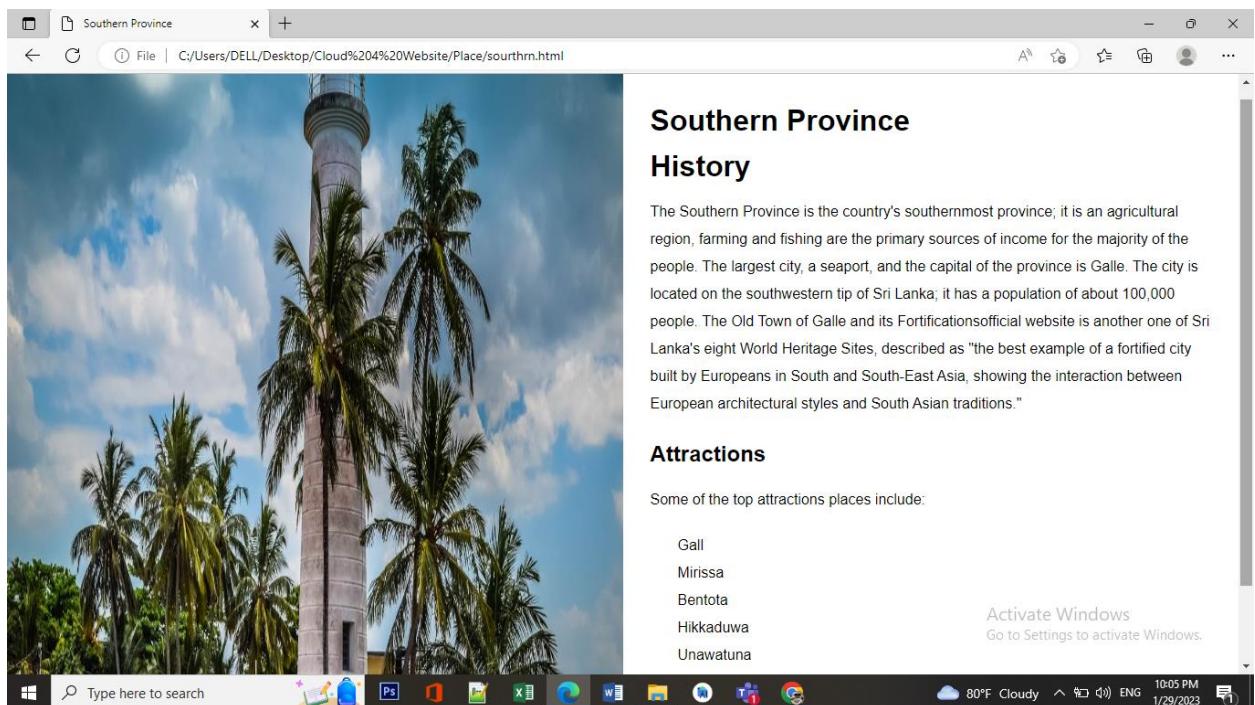

Sabaragamuwa is a landlocked province in the southwest interior of the island, the largest city and capital is Rathnапura, one of the major cities in Sri Lanka. Rathnапura is the center of a long-established industry of precious stone mining including rubies, sapphires, and other gems. Sabaragamuwa province is also a popular tourist destination. Sinharaja Forest Reserve official website is a national park and a UNESCO World Heritage Site; it is the country's last viable area of primary tropical rainforest. Udawalawe National Park lies on the boundary of Sabaragamuwa and Uva Provinces; it is a wild animal sanctuary and a vital habitat for water birds and Sri Lankan Elephants. Sri Pada (also known as Adam's peak; 2,243 m) dominates the southern reaches of the Central Highlands, the tall conical mountain near the town of Hatton is revered by Buddhists, Hindus, Muslims, and Christians as a holy site. By the way, the Central Highlands of Sri Lanka official website is another World Heritage Site.

Attractions

Some of the top attractions places include:

- Udawalawa
- Pinnawala

TEST RESULT

Methodology:

The testing was conducted using a combination of manual testing, automated testing and user feedback. The criteria used to evaluate the website included loading speed, ease of navigation, responsiveness, and the availability of information on destinations.

Results:

Overall, the website performed well in terms of fast loading speed and intuitive navigation. The website also provided a good range of information on destinations, including images and descriptions. However, some areas were identified as needing improvement, such as slow search function and limited information on transportation options. These findings are supported by relevant data and screenshots.

REFLECTIVE JOURNAL

Milestone 4

SRS Report

There was a lot of confusion as to how to do this and we resolved it by asking our mentor . We got a template for this.

Then,

We went for an interview with a company to get information about our project and gained many experiences from it.

We went to interview a company related to our project to get information about our project. This time we discussed many issues directly about our project and thus reduced some issues.

Although there were some problems in doing this, we resolved it using previous experience and submitted it completely.

Topics covered in our SRS report

- 1.Introduction
- 2.Overall description
- 3.Project scope and impact
- 4.External interface
- 5.System features
- 6.Other non functional requirements
- 7.Other requirements
- 8.Analysis models

Milestone 5

Progress review presentation

This presentation's goal is to give a thorough explanation of Sri Lanka's tourism management system. It will describe the functions and characteristics of the system, its interfaces, project workforce management, process architecture, project scheduling, progress life cycle.

While we were doing this presentation, there were many confusions such as how many slides to do, how to divide it one by one, so we arranged a meeting with our Mentor to resolve these confusions.

The presentation consists of 21 slides, which we prepared for each one individual presentation.

Then we sent our presentation to our mentor and After getting the approval we submitted.

cites.openlearn.lk

Start or edit my journal entry

Milestone 1 & 2

Form group & assignment of mentor

This time I was happy to do the project. For the project I have put my friends into teams because it will be easier to work together. This is the first project where I will be working as a team under a mentor. For this I chose my favorite Ahalikai madam as my Mentor.

The project we are going to do is the travel and tourism website. Why we decided to do this is because there are many visit places in our country. But some people do not have enough clarity about it, we are going to provide that clarity through our website and we are going to add new unique features which are not there in many websites.

I hope to gain a lot of experience from this project

Milestone 3

Project proposal

We worked together as a team and did all the work so it was easy to do our work. Each one chose each topic and collected the material. We faced some difficulties as we did not communicate directly but we reduced it with zoom.

This was our first team project and we realized the benefits of working together as a team. We completed many jobs easily in a short span of time. The project we are going to do is 'develop a successful web application for travel and tourism which will be used to book, create, manage and database tourist information for travel management tour packages'.

We tried to solve the problems as a team and decided that future work should be planned more precisely.

4. How to do it differently in the future with suggested improvements?

Start or edit my journal entry

Milestone 1

I was happy that I got the opportunity to do this project and I wanted to choose people for my team and they were my friends.

We chose a name for our group and thought of creating a website about Travel and Tourism . Because there are many places to see in my country but many people don't know about it. Thus we are going to provide them many things through our website.

Milestone 2

We came to the stage of choosing a mentor for our team. As a group we discussed and chose Ahalikai madam.

We were confused as to whom to choose, but we had to choose someone. So we chose her out of everyone's choice. We hoped she would be very supportive of our project and it would be easy to communicate with her.

CONCLUSION

This website was successfully developed and project has been appreciated by our mentor. Any endeavor is incomplete without the spirit of team work. We could not have completed this without our team.

It was used to hold all the booking, creation, management, and tour information for travel administration tourism packages in the database. The software was thoroughly tested, and any flaws were correctly debugged. Additionally, testing revealed that the system's performance is sufficient. The entire required production has been produced. Thus, this system offers a simple method for automating all consumption-related tasks.

The project can yet be improved, making the website run much more attractively and effectively than it does now. It may be said that the application meets the needs and functions well. The software is thoroughly tested, and any faults are properly debugged. It also serves as a means of exchanging files with important sites.
