- 10. Appendix

INTRODUCTION

- ✓ The cloud4 Travel and Tourism website project was initiated in order to provide a comprehensive and user-friendly platform for individuals planning their next vacation or business trip. The target audience for the website includes leisure travelers, business travelers, and travel agents.
- ✓ The website will feature destination guides with detailed information on popular tourist destinations, including things to do, where to stay, and where to eat. Users will also be able to read reviews of hotels, restaurants, and other travel-related businesses, as well as book transport and hotels directly through the website.
- ✓ In addition, the website will offer a trip planning tool that will allow users to create personalized itineraries and share them with friends and family. The website will also include a travel blog, featuring articles written by travel experts and destination-specific information.
- ✓ To promote the website, a comprehensive digital marketing strategy will be implemented, including search engine optimization, social media marketing, and email marketing campaigns. The website will also be optimized for mobile devices, allowing users to access the site and plan their trips on the go.
- ✓ The goal of the cloud4 Travel and Tourism website project is to become the go-to resource for individuals planning their next travel adventure and make the process of planning a trip as seamless and enjoyable as possible.

Problem Statement

- ✓ The purpose of website is established fact that Internet users are increasing today.
- ✓ Today one of the main purposes of the website is to facilitate the offline customer online because customers cannot spend their precious time in markets trying to find out the best deal.
- ✓ Our priority will be our customers and their travel requirements.
- ✓ There will be many users visiting the portal and hence we require a strong and reliable frontend which can withhold the users on our site.
- ✓ We will be putting an effort to provide the right choice to the people when they plan a holiday and beware them from the false advertising

Project Objectives

✓ The objective of this presentation is to demonstrate the effectiveness of our new travel and tourism website as a one-stop-shop for travellers, by showcasing its intuitive design, comprehensive offerings, and advanced technology for easy and efficient trip planning and booking.

Introduction to similar type of Systems

1. Explore Sri Lanka

✓ Introduction: Welcome to "Explore Sri Lanka," a revolutionary tourism management system designed to unveil the beauty and cultural richness of this captivating island nation. This report aims to provide an in-depth exploration of the system, its origins, features, and objectives, with a focus on enhancing the travel experience for individuals planning their visit to Sri Lanka.

✓ Key features

- Destination Guides
- > User Reviews and Recommendations
- ➤ Booking Services
- ➤ Cultural Immersion

2. Serendipity Trails Explorer

- ✓ Introduction: A sophisticated tourism management system called "Serendipity Trails Explorer" was created to reveal Sri Lanka's hidden gems. It aims to give visitors who are eager to discover the island's varied landscapes, fascinating history, and dynamic culture an immersive and customized experience.
- ✓ Features: Through the integration of interactive maps, users are able to explore locations that are not commonly visited. In keeping with sustainable tourism practices, it highlights community involvement through the use of local narratives, artisanal experiences, and collaborations with environmentally conscious lodging.

3. Cevlon Heritage Journeys

- ✓ Introduction: "Ceylon Heritage Journeys" is a leading tourism management system devoted to revealing Sri Lanka's rich cultural and historical legacy. This platform is intended for tourists who want to delve further into the island's historical sites, colonial past, and cultural customs.
- ✓ Features: Multimedia-rich information is integrated into the system, such as conversations with local historians and virtual tours of historical locations. It provides customized travel plans for excursions with a historical theme and makes it easier to work with academic institutions on projects related to educational tourism.

Project Solution

✓ Cloud4 Travel and Tourism website, focusing on providing a user-friendly platform for trip planning and booking. This includes destination guides, a trip planning tool, a travel blog, and features to book transport and hotels directly. The solution also encompasses a robust digital marketing strategy to reach a wider audience, emphasizing search engine optimization, social media marketing, and email campaigns. The ultimate goal is to establish the website as a go-to resource for seamless and enjoyable trip planning.

Technology used

Frontend Technology

- ✓ Figma
- ✓ Html
- ✓ CSS
- ✓ Javascript

Backend Technology

- ✓ PHP
- ✓ My SQL
- ✓ XAMPP SEVER

Development Tools

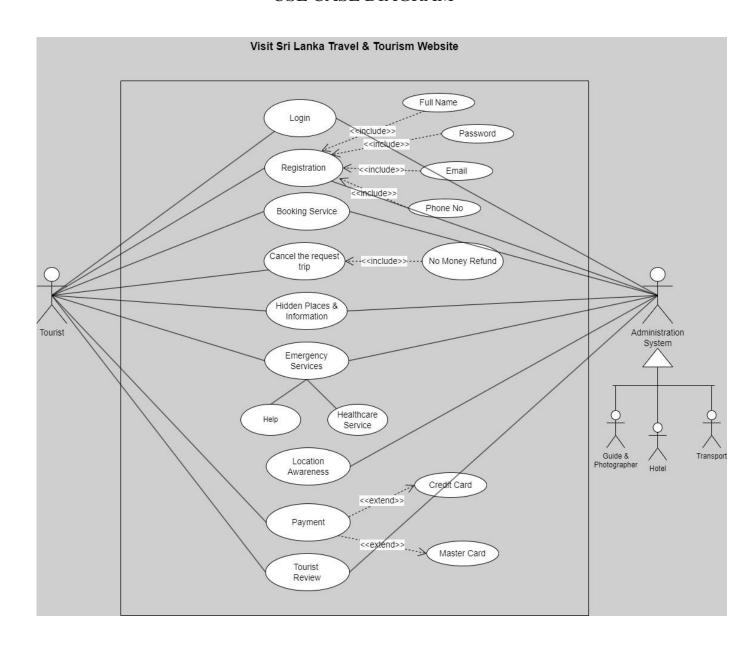

- ✓ Google Chrome
- ✓ VS Code

Vision Control

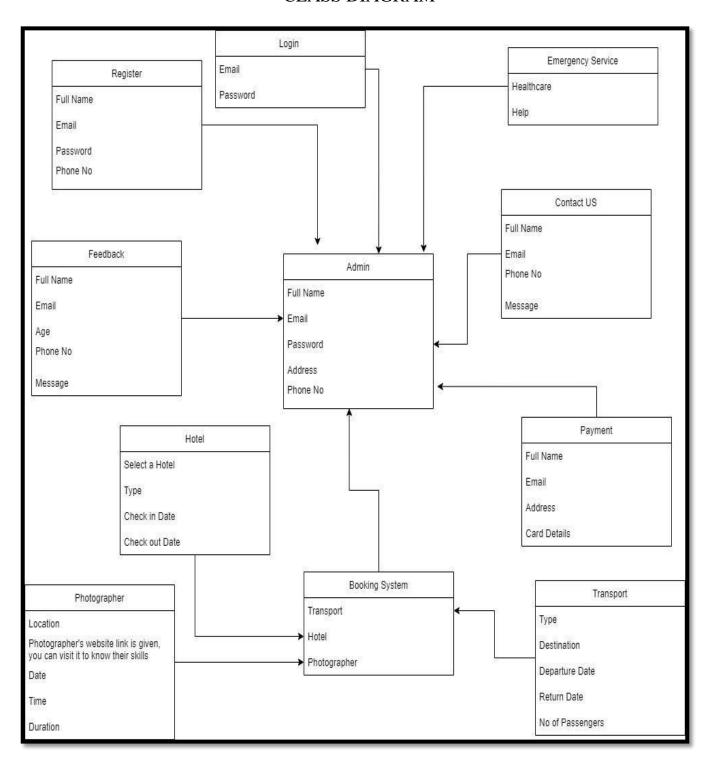

✓ Git Hub

TEST CASE DOCUMENTS

- ✓ It is merely a list of chores that you keep track of for simpler tracking. A software test checklist outlines the tests you should conduct according to a certain process. You can determine all the tests you need to run, the number of successful and failed tests, and more by using a software test checklist.

Home Page

Hotel Booking Page

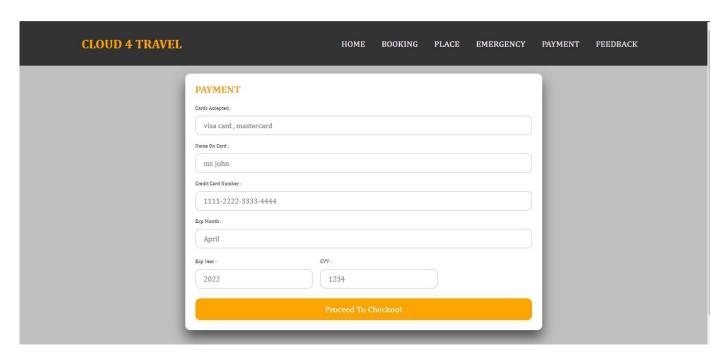

Transportation Booking Page

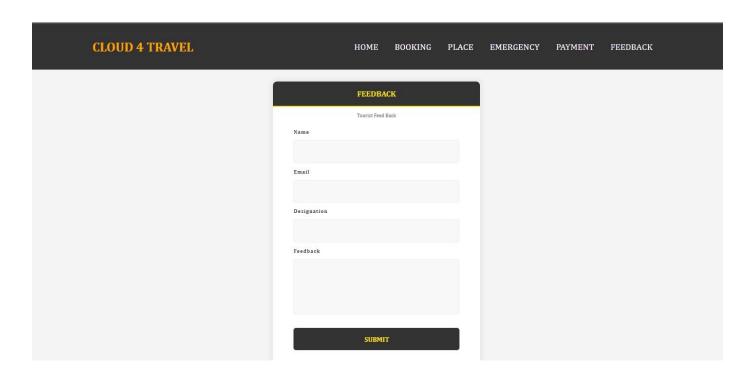

Photographer Booking Page

Payment Page

Feedback Page

TEST RESULT

- ✓ **Methodology:** The testing was conducted using a combination of manual testing, automated testing and user feedback. The criteria used to evaluate the website included loading speed, ease of navigation, responsiveness, and the availability of information on destinations.
- ✓ **Results:** Overall, the website performed well in terms of fast loading speed and intuitive navigation. The website also provided a good range of information on destinations, including images and descriptions. However, some areas were identified as needing improvement, such as slow search function and limited information on transportation options. These findings are supported by relevant data and screenshots.

REFLECTIVE JOURNAL

4. How to do it differently in the future with suggested improvements?

Start or edit my journal entry

Milestone 1

I was happy that I got the opportunity to do this project and I wanted to choose people for my team and they were my friends.

We chose a name for our group and thought of creating a website about Travel and Tourism . Because there are many places to see in my country but many people don't know about it. Thus we are going to provide them many things through our website.

Milestone 2

We came to the stage of choosing a mentor for our team. As a group we discussed and chose Ahalikai madam.

We were confused as to whom to choose, but we had to choose someone. So we chose her out of everyone's choice. We hoped she would be very supportive of our project and it would be easy to communicate with her.

CONCLUSION

- ✓ This website was successfully developed and project has been appreciated by our mentor. Any endeavor is incomplete without the spirit of team work. We could not have completed this without our team.
- ✓ It was used to hold all the booking, creation, management, and tour information for travel administration tourism packages in the database. The software was thoroughly tested, and any flaws were correctly debugged. Additionally, testing revealed that the system's performance is sufficient. The entire required production has been produced. Thus, this system offers a simple method for automating all consumptionrelated tasks.
- ✓ The project can yet be improved, making the website run much more attractively and effectively than it does now. It may be said that the application meets the needs and functions well. The software is thoroughly tested, and any faults are properly debugged. It also serves as a means of exchanging files with important sites.
